

exposable photographic frames [film items] to be exposed, each [film item] exposable photographic frame comprising a first unexposed portion and a second exposed portion[, whereby upon exposure of the first unexposed portion and development there is formed in said first portion a picture corresponding to the exposure alongside a picture corresponding to the second portion].

C1 amended
2. (Once Amended) A package according to Claim 1, wherein each second portion at least in part surrounds its first portion [essentially as a frame].

3. (Once Amended) A package according to Claim 1, wherein each second exposed portion in the package is not developed[, and is later developed simultaneously when its first portion is developed following exposure].

C2
5. (Once Amended) A package according to Claim 2, wherein the package is of instant developing film, each second portion being undeveloped in the package [and being later developed simultaneously when its first portion is developed following exposure].

Please add the following new claims:

- C3
--9. A process for obtaining a developed photograph comprising:
(A) providing a sealed package of photographic film according to claim 1;
(B) opening said package and obtaining said film;

(C) placing said film into a camera;

(D) exposing a photographic frame of said film while in said camera; and

(E) developing said exposed photographic frame.--

D --10. A process according to Claim 9, wherein each second portion at least in part surrounds its first portion.--
